### Welcome to the Sanctuary

---

If you are reading this, you are likely navigating a season of transition. Whether you are facing oncology treatments, alopecia, or hormonal changes, please know that your desire to maintain your image is not vanity—it is a vital component of your mental wellness and healing.

This guide is designed to help you navigate the world of medical hair restoration with dignity, clarity, and confidence.

### 1 What is a “Cranial Prosthesis”?

---

In the medical community, we do not simply use the word “wig.” We use the term **Cranial Prosthesis**. A medical-grade prosthesis is a durable medical device engineered specifically for those with total hair loss or extreme scalp sensitivity.

- **Medical-Grade Bases:** Silk, bamboo, or monofilament liners that allow the scalp to breathe.
- **Silicone Grips:** Non-slip technology that ensures security without the need for harsh adhesives.
- **Hypoallergenic Materials:** Designed to prevent irritation on sensitive skin.

### 2 Navigating Insurance & Reimbursement

---

Many insurance providers cover a significant portion of the cost of a “Cranial Prosthesis,” provided it is prescribed by a physician as a medical necessity.

#### The Roadmap to Coverage

1. **The Prescription:** Ask your doctor for a prescription for a **“Cranial Prosthesis”** (Code A9282).
2. **The HCPCS Code:** Ensure your provider uses insurance code **A9282**.
3. **The NPI Number:** We are NPI-registered providers. We provide a **Superbill** for your reimbursement.
4. **CareCredit:** We offer medical financing to ensure immediate access to care.

### 3 Engineering Your Identity

---

We specialize in **True + Pure Textures** to match your natural hair pattern perfectly.

- **Human Hair:** Most natural movement; can be heat-styled.
- **Medical-Grade Synthetic:** Maintains style through washing; lightweight for fatigue.
- **Hybrid Systems:** A blend for the perfect balance of realism and ease.

### 4 The Integration Difference

---

Unlike standard vendors, Victor Scotti, Jr. designs an identity through:

- **Custom Root Smudging:** Hand-painted roots for scalp-level realism.
- **De-Bulking:** Specialized cutting to remove excess density.
- **Bio-Hair Blending:** Seamless integration with your natural edges.

## 5 FOR YOUR PHYSICIAN: Prescription Checklist

---

To ensure your insurance claim is processed without delay, please ask your doctor to include these specific details on your prescription:

- ☐ **Required Terminology:** Must read “Cranial Prosthesis.”
- ☐ **Medical Necessity:** State “medical hair loss due to [Diagnosis].”
- ☐ **Diagnosis Code:** Include relevant ICD-10 code (e.g., L63.9).
- ☐ **Billing Code:** Include HCPCS Code **A9282**.
- ☐ **Duration:** State if the hair loss is temporary or permanent.

### **Provider Information for the Doctor:**

*The Donna Jean Hair Restoration Clinic is an NPI-Registered healthcare provider specializing in medical-grade cranial prosthetics.*

*“Every prosthesis I craft is a love letter to my mother’s courage—and a commitment to yours.”*
